Subject: Yorba Linda Housing Plan

As a concerned citizen of Yorba, I request that the city's housing plan provide for no more than 200 additional units as required by law. We are already experiencing too much traffic and wild fire evacuation danger due to our density and limited escape arteries.

Thank you,
Colleen Kirtland, [REDACTED]

State housing law requires that the region's housing plan is integrated with the region's transportation plan. As currently drafted, SCAG's regional transportation plan projects an additional 200 households by 2045 in the City of Yorba Linda, but the RHNA projects over 2,400 new housing units by 2029, which does not comply with state housing law. Furthermore, when SCAG assigned the City its 2,400 additional housing units, it did not take into account numerous constraints that exist in the City, including wildfires, protected open space, flood hazards, and numerous other local land-use constraints. SCAG's proposed housing plan is dramatically inconsistent with its adopted transportation plan; therefore, the housing plan needs to be revised to require the City of Yorba Linda to provide for no more than 200 additional housing units.
